

One supplier for all: Webasto Marine extends product portfolio with glazing solutions for boats and yachts

Beside roof solutions Webasto now also offers fixed, sliding and tilting windows

Stockdorf/Munich. – March 16, 2011 – Webasto has expanded its product portfolio. With resistant, waterproof and well-designed glazing for boats and yachts Webasto extends its technological leadership for comfort solutions from one supplier. The offer includes fixed, sliding and tilting windows. The design of the solutions can be customized individually to the manufacturer's requirements and to the concept of each yacht. This enables manufacturers to profit from completely in line roof and window solutions. The result: a harmonic and high class overall design. Linssen Yachts, one of the leading Dutch boat manufacturers, equipped his Range Cruiser 430 Sedan Variotop® Series with Webasto marine windows.

Webasto Marine Windows in detail

In order to withstand applications in the marine environment, Webasto produces its window frames of high-quality and corrosion resistant aluminum. To match all requirements Webasto delivers windows with optional 6 millimeter and 16 millimeter isolated security glass. The window of the 16 millimeter premium version consists of two window panels whose compartment is filled with gas for a perfect isolation.

“Our solutions are wind- and water-resistant as well as resistant against salt and solar radiation”, says Denis Merle, director for marine and recreational vehicles at the Webasto group. “To withstand these extreme conditions our windows are fully tested on their robustness.”

“The Webasto window solutions are a plug-and-play solution. This does not only save time for mounting but also costs because the windows are delivered pre-mounted.”, adds Jos Linssen, Main Shareholder of Linssen Yachts BV.
